BLD22-01079	<p>(TREEFORT MUSIC HALL – PHASE 2 – 1ST STORY – BODO BUILDING #7) (DRH22-00002) The fire sprinkler system is used for fire area and for a multi-theater complex. To create a 17,541 square foot music hall (13,651 square feet 1st story and 3,890 square feet 2nd story) within an existing 138,293 square foot 3 story building (about 63,550 square foot 1st story). This permit is intended to establish a Certificate of Occupancy for the 13,651 square foot 1st story of this tenant space only. Although the 2nd story shell will be constructed under this permit, occupancy for the 3,890 square foot 2nd story will be established under a future Phase 3 permit. Demolition work includes removing portions of the existing concrete slab on grade floor for . . . under slab utilities, removing a section of the existing concrete slab on grade floor and excavating the soil below . . . , removing concrete spot footings and columns at the recessed area, removing sections of the exterior storefront and exterior wall below to accommodate new exterior openings and to accommodate the new stairway addition, and Work is to include a 2,498 square foot recessed area on the 1st story with a concrete floor and retaining walls served by stairs and ramps accessible to the disabled, a 1,210 square foot raised concrete performance platform over structural foam with the front portion having a concrete slab supported by steel beams and columns, stairs and a wheelchair lift to provide an accessible route to the performance platform, handrails on stairs and ramp, two multi-user toilet rooms accessible to the disabled, two single-user assisted-use toilet rooms accessible to the disabled, single-user toilet rooms and a shower room for performers, a single-user toilet room for employees, gypsum board ceilings for the toilet rooms and entry vestibules, ceiling baffles suspended from the floor or roof above, strengthening existing roof beams to function as the bottom cord of new steel trusses to replace removed columns and to support the new 2nd story and occupied roof above, strengthening existing roof beams to support a floor load and added HVAC equipment, steel roof trusses with a metal deck above the new 2nd story, minimum R-30 insulation on top of the deck with a membrane roof covering, steel stud exterior walls with cavity wall insulation and continuous insulation, pedestal supported concrete pavers for the occupied roof deck, overhead sectional doors, side-hinged swinging doors, wood exterior wall finishes, horizontal metal exterior wall siding, steel awnings projecting about 4 feet from exterior walls, The 293 square foot stairway and elevator addition to serve the 2nd story includes concrete footings, concrete elevator pit with sump, concrete stem walls, concrete piers, concrete slab on grade floor, concrete walls, steel columns, steel beams, steel roof deck with minimum R-30 insulation on top of the deck with a membrane roof covering, steel stud shear wall with hold downs, storefront windows, and steel stair stringers with concrete steel pan treads. Work that requires Special Inspection includes concrete, welding, anchors post-installed in hardened concrete, and the application of fire-resistance-rated coatings and coverings. The designs for the stairways, including landings, are a deferred submittal item. The work is required to comply with the approved drawings, with the structural design, with the plan review report, and with all applicable codes and ordinances. The fire sprinkler system is required to comply with NFPA 13 (including quick-response heads) and the voice fire alarm system is required to comply with NFPA 72 as regulated by the Fire Department. Separate fire sprinkler permits and fire alarm permits shall be obtained prior to beginning any modification or installation work on such systems. Mechanical Commissioning report is required to be submitted to mechanical supervisor before final inspection. TJ **CJW**</p>
